

<u>2011</u> Transport 50

Fleet information

| 1. Modular trailer systems | |
|---|--|
| SPMT (self propelled modular transporter) * | |
| - total number of axle lines | lines |
| - total capacity | tonnes ** |
| Conventional modular trailers * | |
| (8 wheels per line) | lines |
| - total number of axle lines | tonnes ** |
| - total capacity | torines |
| Conventional modular trailers * | |
| (4 wheels per line) | lines |
| - total number of axle lines | tonnes ** |
| - total capacity | |
| Self propelled conventional modular trailers* - total number of axle lines | linos |
| - total number of axie lines - total capacity | lines ** |
| 2-axle American style house/structural | tornes |
| moving type dollies | |
| - total number of dollies | dollies |
| - total capacity | tonnes ** |
| Total capacity | |
| | |
| of all modular trailers and dollies * electronic multi-way steering versus hydro-mechanical power | steering |
| • | |
| * electronic multi-way steering versus hydro-mechanical power | |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes | steering |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers | steering |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity | steering |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader | steering units capacity |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units | steering units capacity units |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity total capacity | steering units capacity units |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer | steering units capacity units capacity |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer - total number of units | steering units capacity units capacity units |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer - total number of units - total capacity | steering units capacity units capacity units |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer - total number of units - total capacity Long load dolly | steering units capacity units capacity units capacity units capacity units |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer - total number of units - total capacity Long load dolly - total number of units | steering units capacity units capacity units capacity units capacity units |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer - total number of units - total capacity Long load dolly - total number of units - total capacity | steering units capacity units capacity units capacity units capacity units |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer - total number of units - total capacity Long load dolly - total number of units - total capacity Total capacity Total capacity | steering units capacity units capacity units capacity units capacity units capacity |
| * electronic multi-way steering versus hydro-mechanical power ** Please supply figures in metric tonnes 2. Specialized trailers Double drop / low loader - total number of units - total capacity Step frame / semi-low loader - total number of units - total capacity Extendable flatbed trailer - total number of units - total capacity Long load dolly - total number of units - total capacity | steering units capacity units capacity units capacity units capacity units |

2011 Transport 50

Company information:

| Company | | |
|--|--|--|
| Head office: - City | | |
| - Country | | |
| Number of depots | | |
| Area of operation | | |
| Number of employees | | |
| Senior contact and job title | | |
| Web address | | |
