Chief Executive

National Federation of Demolition Contractors

Background

- The NFDC was formed in 1941 in to a request from the Government to bring the industry together.
- Today, the Federation has 160 Corporate members and 65 Associate members
- These are split into five regions

Background

Together, the NFDC's members
are responsible for almost
90 percent of the demolition
that takes place in the United Kingdom
With members carrying out significant projects in
mainland Europe

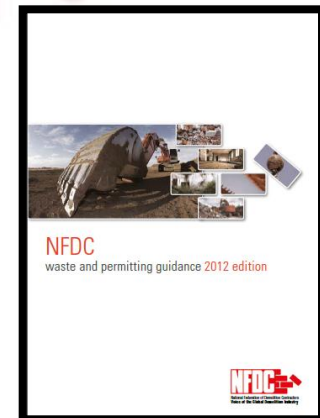

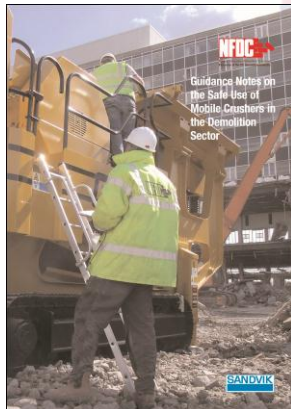

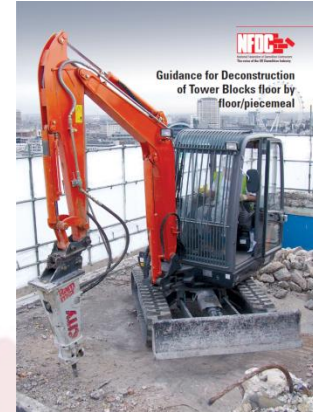

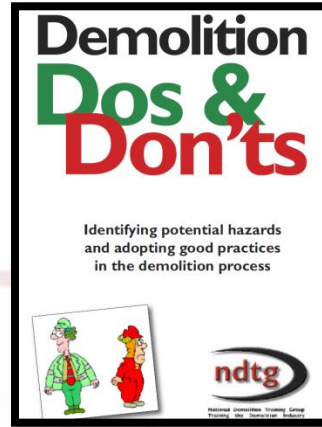

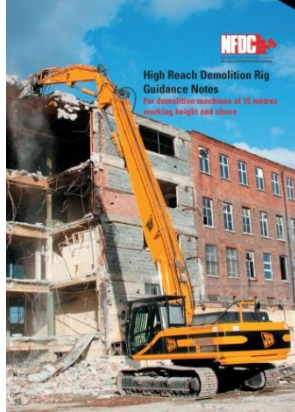

The Voice of the UK Demolition Industry

Background

- NFDC members are bound by a strict Code of Conduct
- The Federation is represented on a number of external committees covering areas such as British Standards, training, and health & safety guidance.
- The NFDC is at the forefront of revising and updating technical specifications for the industry

The NFDC is more than just a trade association...

It is a body that helps steer a business sector; that provides vital information to its members; and is recognised as the voice of the global demolition industry.

The NFDC raises the profile of demolition companies by identifying them as *reputable* and *trustworthy*. The rigidly imposed high standards required for admittance to the NFDC are monitored on an ongoing basis, ensuring that standards are maintained throughout the duration of membership.

All members agree to abide by the Federation rules that encompass an exacting *Code of Conduct*. The NFDC expects its members to provide a service to clients that meet the highest standards of professional management, workmanship, courtesy and integrity. With the addition of the annual Accredited Site Audit Scheme partnered with CHAS accreditation as a condition of corporate membership, these standards are now monitored and policed to ensure consistently high standards and to provide corporate members with a *mark of distinction and quality*.

The Voice of the UK Demolition Industry

A history of innovation

- The NFDC has a proud record of innovation and self-improvement
- The initiatives of the Federation are **directly responsible** for the reduction in the number of accidents in the demolition industry
- The NFDC leads the way in the improvement of working conditions for its members and their employees

“...The NFDC are respected as the voice of the Global Demolition industry and set the standards that many strive to follow..”

Accredited Site Audit Scheme

National Federation of Demolition Contractors
The voice of the UK Demolition Industry

Accredited Site Audit Scheme

- The scheme is designed to benchmark and monitor member companies performance and has been partnered with CHAS to demonstrate that the Federations high standards are independently audited.
- The audit includes a thorough inspection of the company health & safety policy followed up with a site inspection to ensure described procedures are being implemented on site.

Accredited Site Audit Scheme

- The Accredited Site Audit Scheme was designed as a quality mark for NFDC members.
- It illustrates our combined commitment to on-going improvement
- It sets us aside from non-member companies
- It provides our customers with an assurance of quality.

Accredited Site Audit Scheme

- The Pilot Scheme was officially launched in January 2006
- The scheme partnered with CHAS in November 2011
- All federation members are audited annual with audit details available on the NFDC web site and CHAS

The Voice of the UK Demolition Industry

National Demolition Training Group

The logo for the National Demolition Training Group (ndtg) is centered in the middle of the page. It consists of the lowercase letters 'ndtg' in a bold, red, sans-serif font. The letters are contained within a large, black, three-dimensional oval shape that has a slight shadow, giving it a sense of depth. The entire logo is set against a white background.

The bottom of the page is decorated with a pile of red, rectangular blocks of various sizes and orientations, scattered across the width of the page. The blocks have a slight shadow, giving them a three-dimensional appearance.

The Voice of the UK Demolition Industry

Training

- The National Federation of Demolition Contractors is a key player with the provision of training and competency within the Demolition Industry.
- The NFDC manages the industry training arm- The National Demolition Training Group.
- Not only does the NFDC commit to the development of training for the whole of the Demolition Industry, it also ensures that all Federation Members commit to the training of their workforce.

Training continued

- A condition of membership requires members to train all of their demolition operatives, through from operative level to manager level. On admittance to membership of the federation, each new member automatically becomes a member of the NDTG and are required, as a condition of continuing membership, to participate in courses provided by the training group.
- The NFDC Site Audit Schemes enforces the requirement for training by NFDC Members.
